

TradeLock Password Protection: Price Sheet

	Annual Fee
Industry Level (\$100 set-up fee applies)	\$200
<p><u>Industry Level TradeLock</u> allows verified members of the jewelry industry into a website while keeping the general public out. When a page is placed within the TradeLock protection system, a box opens whenever that page is requested. The user enters their username and password into the box and is given access. If the login fails, the user is presented with a page explaining why the login may have failed, which includes a link to register for an ID if they do not have one.</p>	
Private List Level (\$250 set-up fee applies)	\$500
<p><u>Private List Level TradeLock</u> restricts a website to your customer list. Private List Level can be used in conjunction with Industry Level to provide a general section for the entire trade and a further-restricted section for a subset of this group; for example, your existing customers. The website owner can submit a list with their customers, and update it regularly throughout the year.</p>
